

Apex
FACADES

LIMITLESS
SOLUTIONS

We are an
**Australian rope access and
high rise construction company**
specialising in difficult access
and complex facade
remediation projects.

Mitchell Haskard

Andrew Gennings

APEX FACADES

Since 2017, Apex Facades has been a mainstay of Australia's construction and maintenance scene.

Operated in partnership by Mitchell Haskard and Andrew Gennings, Apex Facades has become renowned for exceptional service delivery in the fields of rope access, rigging and specialist construction.

Although new technological processes have entered the market in recent times, the flexibility of rope access simply cannot be surpassed.

VERTICAL PROFESSIONALS

Our mission is to provide our clients with clear and concise solutions that ensure projects are completed efficiently and safely, whilst maintaining the highest level of quality.

Apex Facades holds international certification in Quality (ISO 9001:2015), Safety (ISO 45001:2018), and Environmental (ISO 14001:2015) management. This integrated management system guarantees high quality service, high standards of safety, and minimal impact on the natural environment.

We are committed to implementing the ISO Integrated Management Systems for Quality, Safety, and Environment, to promote accountability and responsibility at senior management level, and through all levels of the company. We invest in our people through regular training and career progression, to achieve the best contribution and highest ethical behaviour from all employees.

AT THE TOP OF OUR GAME

Our vision has not changed since the first days of operation. It is integral to the safety of our employees and the value and quality we provide to our clients.

Since opening our doors, our team has been involved in numerous complex projects in partnership with some of Australia's largest construction companies and investment management firms.

Projects often require engineering new work methods while meeting challenging deadlines.

Our team ethos is based on ensuring our clients are always more than satisfied with the work as it is delivered. This involves the comprehensive exploration

and careful consideration of all options available to both the project and client budgets. As such, the planning and preparation we undertake before commencement is always a priority.

The combined experience of our site and management teams ensures all considerations are taken into account.

We keep our clients informed, included and advised of every step we plan and action throughout each project.

TEAMWORK MAKES THE DREAM WORK

Our team has maintained three core values since inception. They are the baseline on which our business operates – for the security of our employees and clients.

Safety

To ensure that there is as little risk possible in all projects. Our priority is to ensure that our high standards of safety are maintained at all times.

Efficiency

For the benefit of our clients, by engineering and pioneering new processes to reduce cost and time; and for our team to ensure they do not put themselves unnecessarily at risk.

Quality

We promise all work undertaken by our team will be of the highest standard – guaranteed!

Apex Facades is made up of a diverse team of specialised rope access technicians committed to our company principles, operating Australia-wide with offices in Brisbane and Sydney.

Apex Facades has a diverse range of resources, experience and expertise to deliver the highest of quality solutions to suit your building, your business, your deadline and your budget.

AGILE
AT ALTITUDE

THE SKY'S THE LIMIT

We are proud of the partnerships we have formed with many leading construction companies, developers and investment management firms (including those listed here). The calibre of such organisations and their commitment to safe, efficient, cost efficient projects is testament of our service capabilities.
